

TINNO

Shenzhen Tinno Mobile Technology Corp.

Conflict Minerals Report 2024

Editor: Yang Yang, Nathan Lai, Lily Zhang
Jane Wang, Calven Deng

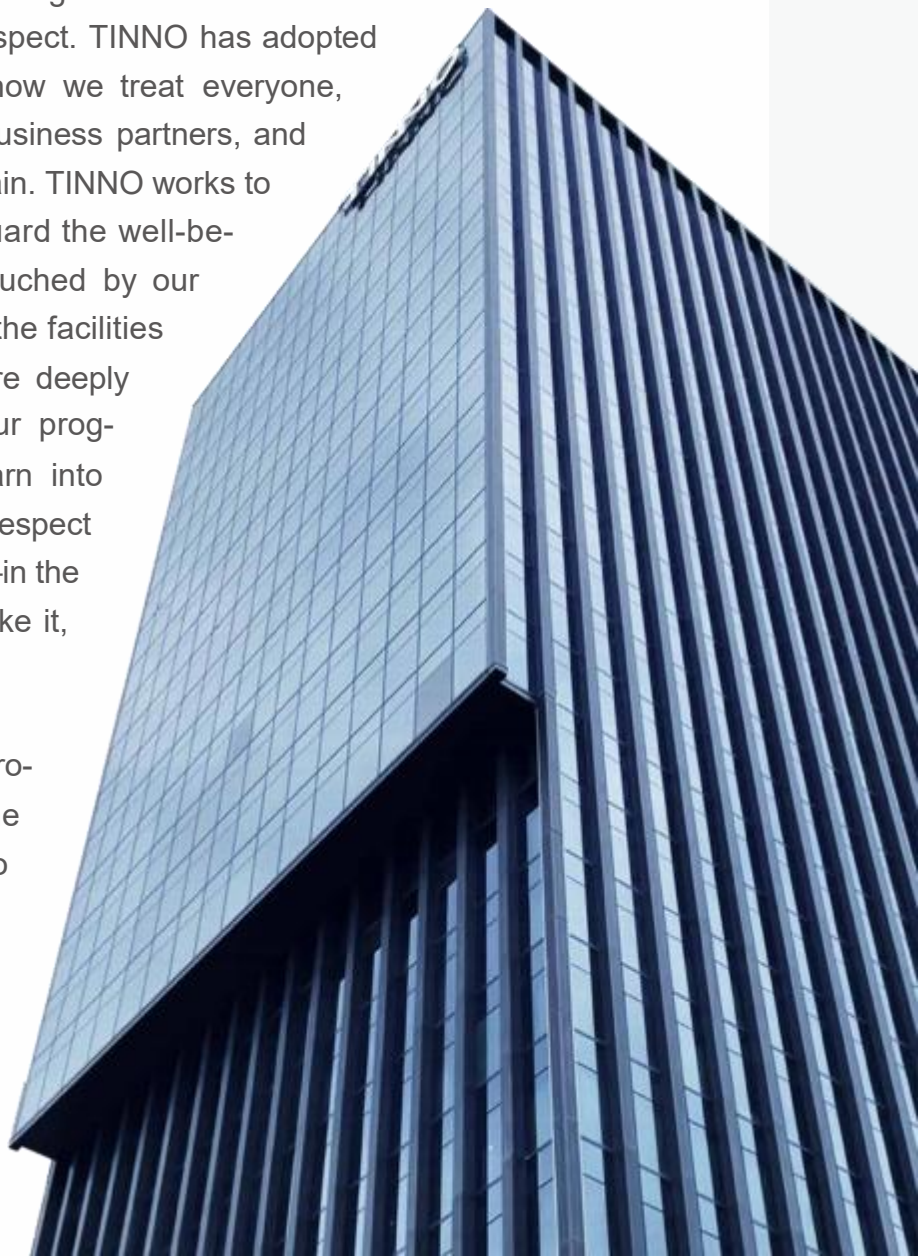

Conflict Minerals Policy

No direct or indirect use of metals sourced from armed conflict and illegal mining in the Democratic Republic of the Congo and its adjacent countries/areas, and not to directly or indirectly finance or benefit armed groups that abuse human rights in the Democratic Republic of the Congo or its adjacent countries/areas; Suppliers of TINNO and TINNO's affiliated subsidiaries shall investigate the Conflict Minerals (gold/tantalum/tin/tungsten/Cobalt/Mica) and other metals contained in their products and confirm the source of these metals.

Summary of TINNO's Commitment to Responsible Sourcing

At TINNO, our respect for human rights begins with our commitment to treating everyone with dignity and respect. TINNO has adopted a human rights policy that governs how we treat everyone, including our customers, employees, business partners, and people at every level of our supply chain. TINNO works to protect the environment and to safeguard the well-being of tens of thousands of people touched by our supply chain, from the mining level to the facilities where products are assembled. We are deeply committed to continually assessing our progress and building the lessons we learn into everything we do. We've embedded respect for human rights across our company—in the technology we make, in the way we make it, and in how we treat people.

TINNO does not directly purchase or procure primary sourced minerals from mine sites. We are, however, committed to both meeting and exceeding internationally - accepted due diligence standards for primary minerals and recycled materials:

TINNO's Policy of Conflict-Free Mineral:

For minerals such as tantalum Ta, tin Sn, tungsten W, gold Au, Cobalt, Mica from conflict or high-risk areas, metal minerals controlled by non-government armed forces or illegal military factions through smuggling trade channels are conflict minerals .

TINNO requires suppliers to abide by the Responsible Business Alliance Code of Conduct (RBA), and only purchase materials from environmentally and socially responsible suppliers. All suppliers cannot purchase and use conflict minerals, meet the requirements for conflict-free minerals, and Procurement from the Responsible Minerals Assurance Process (RMAP) certified smelter and refinery list identified by the Initiative (RMI) (<http://www.responsiblemineralsinitiative.org/>). All suppliers should source metals from smelters and refiners that are RMAP certified for conflict-free metals. Smelters and refineries that are not RMAP certified must be removed from the supply chain.

TINNO's Supplier Requirements

Suppliers are required to inform and take alternative solutions immediately if conflict minerals are used to provide products of TINNO. After the rectification is confirmed, the supplier can be continued to ensure full compliance with the conflict-free requirements. The relevant product materials related to conflict minerals are handled as non-conforming products.

Suppliers and supply chains are required to conduct commercially reasonable due diligence on an annual basis to ensure that the metals used in the products supplied to TINNO do not originate from conflict minerals. Changes in the information of suppliers or supply chain conflict mineral smelters and refineries (including additions or removals), as the main change management, if it occurs, it also needs to pass the RMI conflict mineral report template or other IPC-1755 conflict mineral data exchange notify TINNO of the report required by the standard.

Suppliers in the supply chain, mineral processors, mining companies or source ore all need to formulate relevant policies and management processes for conflict minerals in accordance with the requirements of the Organization for Economic Cooperation and Development and this standard.

- **Step 1:**
Strong Company Management Systems

In alignment with Step 1 of the OECD Due Diligence Guidance, TINNO has robust internal policies and management systems overseeing its efforts for responsible sourcing of minerals.

This applies to every business decision in every area of the company worldwide. TINNO's code of business conduct provides a standard guide for what is required of everyone at TINNO. TINNO expects its suppliers, contractors, consultants, and other business partners to follow the business conduct policy's principles of honesty, respect, confidentiality, and compliance when providing goods or services to TINNO or acting on its behalf. TINNO's company-wide Human Rights Policy governs how TINNO treats everyone, from customers and teams to business partners and people at every level of its supply chain.

- **Step 2:**
Identification and Assessment of Risk in the Supply Chain

Consistent with Step 2 Due Diligence Guidance, we continuously conduct risk identification on, and assessments of, our supply chain. We work at multiple levels in our supply chain to identify and assess risk, including requiring our suppliers submit an industry-standard Conflict Minerals Reporting Template (CMRT). We collect and process data provided by suppliers through their completion of the CMRT to map our supply chain to the smelter and refiner level and, to the extent available, to the mining level. Under the Responsible Sourcing Standard suppliers are also required to inform TINNO immediately if they identify certain high risks of the OECD Due Diligence Guidance, such as conflict or human rights risks associated with Conflict Minerals.

- **Step 3:**
Report on Supply Chain Due Diligence

TINNO reports annually on its due diligence requirements through its Conflict Minerals Report filed . Tinno also publishes a list of all identified Conflict Minerals , smelters and refiners in its supply chain.

About This Report

For the reporting period from January 1 to December 31, 2024. Information contained on the website referenced in this report is not part of, or incorporated by reference into, this filing. Information presented in this report is based on calendar years.

ANNEX I: Smelter and Refiner List

List of identified smelters and refiners of Conflict Minerals reported in TINNO's supply chain as of December 31, 2024.

Metal	Smelter Look-up	Smelter Country	Smelter Identification
Tin	Tin Smelting Branch of Yunnan Tin Co., Ltd.	CHINA	CID002180
